WORLD MEAT CONSUMPTION

ABOVE 1956-60 AVERAGE

During the past 6 or 7 years meat consumption per person has increased materially in the deficit meat producing countries of Western Europe, in Bulgaria, Czechoslovakia, East Germany, USSR, Japan, Canada, and the United States. Rising consumer incomes in most of these countries have resulted in higher meat consumption, particularly that of beef and veal. Strong demand for meat in these meat-deficit areas has held down consumption in Australia, Ireland, Uruguay, and Argentina as these exporting countries have been able to ship large amounts of meat at favorable prices. New Zealand has increased meat consumption despite strong export demand.

In 1963 per capita meat consumption was above the 1956-60 average in 30 of the 40 countries for which detailed statistics have been compiled. Consumption was below average in the remaining 10 countries, including 5 in South America, as well as Ireland, Poland, Yugoslavia, Republic of South Africa, and Australia. From 1962 to 1963, consumption per person increased in 24 countries, remained unchanged in 4 others, and decreased in 12.

Per capita consumption in 1963 ranged from 13 pounds in Japan to 240 pounds in New Zealand. The 9 leading consumers following New Zealand were Australia, 219; Argentina, 216; Uruguay, 203; the United States, 169; Canada, 140; United Kingdom, 139; France, 132; Denmark, 130, and Belgium and Luxembourg, 123. Consumption exceeded 200 pounds of meat per person in only 4 countries during the year. In 12 countries consumption was between 100 and 200 pounds; in 17, between 50 and 100 pounds, and in 7 less than 50 pounds.

This Circular contains information similar to that published in World Agricultural Production and Trade, September 1964.

Beef and Veal

This circular publishes for the first time detailed statistics by types of meat for all countries. Beef and veal consumption per person in 1963 was above the 1956-60 average in 31 countries under review, but below average in 8 countries.

During 1963 beef and veal consumption ranged from 4 pounds per capita in Japan to 190 pounds in Argentina. The other high consuming countries using 104 pounds or more per person each were Uruguay, Australia, and New Zealand. Consumption in the United States was 99 pounds and in Canada 80. Other countries using over 50 pounds were France, 73; United Kingdom, 67; Paraguay, 67; Belgium and Luxembourg, 61; Colombia, 57; Switzerland, 54 and the Republic of South Africa, 54.

Pork

Pork consumption in 1963 increased in only 11 countries over a year earlier. Utilization per person in 15 other countries remained unchanged from a year earlier but it declined in 12 countries. Consumption in 23 countries exceeded the 1956-60 average; in 8 it equaled the average and in 7 others it was below average.

Range in per capita consumption during 1963 was from a low of 6 pounds in the Republic of South Africa to a high of 84 in Denmark. Other leading consumers were: West Germany, 69; Austria, 69; the United States, 65; Hungary, 62; Switzerland, 58; Sweden, 57; Czechoslovakia, 56; Belgium and Luxembourg, 54; Canada, 51, and the Netherlands, 50.

Lamb, Mutton and Goat

Consumption of lamb, mutton, and goat meat varies sharply from country to country, averaging as little as under one-half pound per person per year in several countries, as high as 93 pounds per person in Australia and 96 in New Zealand. The other leading consumers in 1963 were Uruguay, 34; Greece, 27; United Kingdom, 24; Ireland, 18; Republic of South Africa, 15; Bulgaria, 14; Argentina, 11; Norway, 9; and USSR, 9. The United States is well down the list at 5 pounds.

Consumption in 1963 was above average in Greece, USSR, Australia, and New Zealand. It was average in Norway, the United Kingdom, and Bulgaria, but below average in Argentina, Uruguay, Ireland, and the Republic of South Africa. During 1962 and 1963, consumption increased in Greece and Ireland; remained unchanged in the United Kingdom, Bulgaria, USSR, and New Zealand, but declined in Australia, Argentina, Uruguay, Norway, and Republic of South Africa.

Horse Meat

Horsemeat is important as human food in most European countries, the USSR, and Japan. The leading consumers in 1963 were Belgium and Luxembourg, 7 pounds per person; France, 5 pounds; the Netherlands, 4; and Sweden, 3.
